Process of elimination / within OH&S guidelines

Many people don't think about their roof until there is a problem. Flexiplumb covers preventative maintenance, annual inspections and repairs to all rooves. We will complete all necessary paperwork (JSA's/ SWMS's) prior to accessing the roof in accordance with current Workplace requirements (OH&S) and locate and repair the source of the damage.

Some roof leaks can be quite tricky and this is where our process of elimination starts. We attack the most obvious problem/s and work our way through to get to the heart of the fault.
