

Flexiplumb has established an experienced team of professionals whose working

Philosophy is based on mutual respect, quality workmanship, safety and on-time performance.

WELCOME TO FLEXIPLUMB PLUMBING

Unlike other trades, plumbing isn't always something you can appreciate immediately – but it's reassuring to know that when you call on Flexiplumb you will get the best materials, prompt reliable service and quality available. Flexiplumb aims to give our clients no reason for complaint. With 15 years of experience our great reputation continues to grow. Over the years Flexiplumb has evolved to suit client demands, and it is from this ability to adapt that our name Flexiplumb evolved.

Flexiplumb is in business because we enjoy being able to provide our existing and new clients with our professional, friendly and reliable plumbers.

Flexiplumb has established an experienced team of professionals whose working philosophy is based on mutual respect, quality workmanship, safety and on-time performance.

OTHER SERVICES

SPLIT SYSTEMS –

Helping to control your personal environment Flexiplumb will size a suitable unit to meet your needs.

RAIN WATER HARVESTING -

Don't let your valuable water go down the drain; reduce your dependence on mains pressure water by getting Flexiplumb to customise your rain water harvesting methods.

PLUMBING SYSTEM AUDITS -

Flexiplumb is known in the industry for maintaining high standards. As a result we are often contracted for

an independent audit of existing plumbing systems. Audits are carried out to be pro active, helping to prevent costly plumbing emergencies and putting client's minds at ease.

AGE CARE PLUMBING

Flexiplumb has actively worked within the Aged Care industry for 15 years. When it comes to health care and accommodation for the elderly, it is paramount that facilities are maintained to meet current Health Department standards, and local requirements.

At Flexiplumb we know the special requirements and standards needed, whilst respecting the rights of residents in their home. From the large non for profit sector through to the ever expanding private sector, Flexiplumb have a passion for Aged Care and have an unmatched reputation for rapid response and getting 'it' right the first time.

BLOCKED DRAIN PLUMBING

Don't let one blocked drain ruin your whole day!

At Flexiplumb Plumbing, we have strived to provide the best and most cost effective services to our customers and clients as blocked drains can turn out to be quite problematic! We understand that toilet blockages in particular can be a distressing event, so we aim to respond to your calls as a priority.

With a willing team of plumbers, specialized equipment and the latest technology including our high-pressure water jetting equipment and top quality drain clearing machines, we can ensure your blocked drains are cleared fast. For persistent problems we will use CCTV drain inspection cameras and provide you with a detailed report on the problem and the best solution to fix it, saving you time and money.

THERMOSTATIC MIXING VALVES / WARM WATER SYSTEMS

Hot water burns like fire.

Water burns above 45 degrees celsius and for this reason thermostatic control of hot water systems is mandatory in many situations including Aged Care, Hospitals and Schools. The valves used to control the temperature of the hot water need annual inspection, servicing and calibration.

For 15 years Flexiplumb has been licensed to service, replace and install thermostatic mixing valves to meet Department Standards and current Australian Standards. Flexiplumb will provide the certification required on all installations and services.

Flexiplumb has devised quick, efficient servicing methods that ensure our clients will not be scalded.

HOT WATER SERVICES AND SYSTEMS

Flexiplumb can repair or replace any brand of Hot water service, gas or electric and even upgrade systems to meet specific needs, making them more efficient, creating savings on energy and water costs.

GAS FITTERS

GAS FITTING REPAIRS AND INSTALLATIONS

Flexiplumb's professional and qualified gas technicians have the experience and equipment to service all your gas needs. Flexiplumb provide gas appliance installations with minimum fuss and disruption to services. Whether it's locating a leak or upgrading fitting lines and appliances Flexiplumb will ensure that all work complies with AG601 standards.

OUR GAS FITTING SERVICES INCLUDE:

- Gas appliance installations.
- Gas connections.
- Gas detection equipment.
- Installation and repairs to gas appliances Eg. Hot water heaters.
- Natural gas and LPG services.

ROOFING

Process of elimination / within OH&S guidelines

Many people don't think about their roof until there is a problem. Flexiplumb covers preventative maintenance, annual inspections and repairs to all rooves. We will complete all necessary paperwork (JSA's/ SWMS's) prior to accessing the roof in accordance with current Workplace requirements (OH&S) and locate and repair the source of the damage.

Some roof leaks can be quite tricky and this is where our process of elimination starts. We attack the most obvious problem/s and work our way through to get to the heart of the fault.

We can replace box gutters, loose roof sheets or rectify existing systems that have been installed incorrectly.
